### Suhner Australia Training and Demonstration Centre

Suhner is a leader in stainless steel and aluminium polishing equipment and consumables.

At the head office of Suhner Australia in Silverwater NSW, a brand new training and demonstration centre has been built.

The centre provides a unique base for customers to try out new techniques to meet their application requirements, reduce time required and gain a better finish. Whether it's stainless steel, aluminium or some special metal that is being polished or finished, Suhner Australia can provide a solution and the customer can actually trial it!

The demonstration centre provides a safe environment in which to test the Suhner electric, pneumatic and flexible shaft grinding and polishing tools. Our in-house experts in stainless and aluminium polishing are on-hand to ensure that any application or technique can be analysed and tried out to produce the required finish or polishing solution.

The new centre was put to its first test with some of our stainless steel fabrication customers enjoying our 100 year celebratory conference which introduced new stainless polishing tools and abrasives as well as new metal finishing techniques.
