

SUHNER®

INOX Cleaning Range

A quick and effective way to remove aggressive deposits, rust and dust from metals, and then protect and polish for substantial time!

The New Suhner INOX Cleaning Range

It makes all contaminations on stainless steel, aluminium, copper and mild steel remarkably easy to remove by hand

The new, 'green' based Suhner INOX range of cleaning agents is perfect for stainless steel and other metals. It cleans, protects and polishes. All three agents are made from plants, are free of harmful chemicals and very effective against even the most aggressive deposits of contamination, all kinds of rust and dirt on metals.

polish metals. The agents can be used on various metals including stainless steel, nickel, copper, bronze, chromium and aluminium. All three Suhner agents can be used independently or collectively by hand. Users simply apply the agent required for the job at hand.

Included in the range are the INOX Sun Clean, Sun Protect and Sun Polish. Fast-acting, the plant-based ingredients of all three agents work remarkably effectively and easily to clean, protect and

Sun Clean

- Removes all kinds of rust and deposits from the pores of metals
- Does not damage the oxide film on the metal
- Use on stainless steel, aluminium, copper and mild steel
- 100% organic and so does not pose any risks to health or the environment

Sun Polish

- Cleans matte surfaces and removes tarnish
- Gentle on both material and the skin
- Brings the shine back to metal quickly and easily
- Suitable for stainless steel, nickel, copper, bronze, chromium, and aluminium

Sun Protect

- Neutral and mild cleaning agent washes away all residue
- Leaves a protective nanolayer on the surface for additional protection against future corrosion and contamination
- Reduces maintenance costs especially in areas with delicate air conditions such as indoor pools or offshore sites
- Not harmful to humans or nature
